Governor Christie, you signed the Offshore Wind Economic Development Act more than three years ago, but unfortunately the program has stalled. Now, New Jersey is getting left behind as businesses look to other states for their job-creating projects. Let’s bring them back.

Investing in offshore wind will create local jobs, clean up our air, grow our economy and provide safe, reliable power to our homes and businesses. Our Board of Public Utilities can make it happen. Urge the BPU to implement your law and bring clean, safe and reliable offshore wind power to the Jersey Shore.
