DEAR MEMBER OF CONGRESS,

Family planning should be universal! According to the World Health Organization, over 222 million women around the globe would like to plan their family size but aren’t currently using a modern contraceptive method.

The United States needs to increase its investment in international voluntary family planning to $1 billion a year. Doing so can help women and men choose if, when, and how many children to have, which will improve the health of women and families, communities and economies, and the planet.
