Dear Senator,

Building clean, renewable energy in Pennsylvania will clean up our air, protect our water and safeguard our families from the worst impacts of climate disruption, like droughts, heat waves and stronger storms. At the same time, renewable energy projects have already created good, family-sustaining jobs across the state.

However, we’re falling behind. The good jobs once created by our Alternative Energy Portfolio Standard (AEPS) are being lost to states like New Jersey, Delaware and New York, while our kids continue to suffer from dirty air and polluted water. But you can turn this around. Increasing Pennsylvania’s commitment to renewable energy will create jobs, strengthen our economy and lead to a more secure future for our families.

I urge you to take action to grow our economy and protect our kids from dangerous pollution. Add your name as a co-sponsor to SB 1171 to strengthen our AEPS and affirm Pennsylvania's commitment to job-creating renewable energy.

Sincerely,
