“Climate change is a fact. And when our children’s children look us in the eye and ask if we did all we could to leave them a safer, more stable world, with new sources of energy, I want us to be able to say yes, we did.”

—President Obama, 2014 State of the Union

THANK YOU, PRESIDENT OBAMA, FOR ACTING ON CLIMATE.

EPA’S CARBON STANDARD WILL PROTECT US AND CLEAN UP AND MODERNIZE HOW WE POWER OUR NATION. FOREVER.

Last summer, President Obama announced a number of significant steps to address climate disruption. The centerpiece of his Climate Action Plan will be—for the first time ever—to reduce carbon pollution from power plants.

By establishing strong carbon emissions protections, the EPA is moving to clean up and modernize the way we power our country. These protections will ensure that our kids, our communities and America’s workforce are healthier, while also creating much-needed jobs. Clean Air Act safeguards have spurred industries to develop and adopt innovative solutions to reduce pollution from power plants and, in the process, created new jobs and strengthened our economy.
