**WHAT:** Rally for Renewable Energy at LIPA’s October Board Meeting  
**WHEN:** Thursday, October 30, 10am  
**WHERE:** LIPA HQ, 333 Earle Ovington Blvd, Uniondale
In response to Long Islanders’ demands for cleaner power, last year LIPA committed to purchasing 280MW of new renewable energy, enough to power 150,000 homes.

The LIPA Board of Trustees is expected to decide on this new power source by the end of the year. Choosing offshore wind would make New York’s first offshore wind farm a reality.

Building a large-scale offshore wind project will attract new businesses, create jobs and grow our economy while providing Long Island with clean, reliable power. At the same time, it will reduce our dependence on polluting fossil fuels and clean up our air.

Let’s make sure LIPA and Governor Cuomo don’t miss this historic opportunity to make Long Island, and New York, a national renewable energy leader.
