The proposed RAM coal export terminal near Ironton threatens our coastal restoration efforts and would bring mile-long, uncovered coal trains through the heart of Belle Chasse and Jesuit Bend.

Gretna, Westwego and Jefferson Parish recently passed resolutions that oppose dirty coal trains and request that the Army Corps conduct public hearings and complete a comprehensive economic and environmental study on the RAM coal export terminal. We applaud the bold leadership of those who have taken a stand for coastal restoration and quality of life in our region.

What will Plaquemines leaders do?
Tell your Parish leaders and candidates to stand up for coastal restoration and against uncovered coal trains.
