The proposed RAM coal export terminal in Plaquemines Parish threatens our coastal restoration efforts and would bring mile-long, uncovered coal trains through the heart of Gretna and the Westbank.

Gretna city leaders showed tremendous leadership September 10th when they passed a resolution calling on the Army Corps to conduct public hearings and do a comprehensive economic, environmental, and public health study on the RAM Terminal and its coal trains.

This is a huge step in making sure that the concerns of West Bank residents are considered before the interests of out-of-state coal companies.
Thank You Gretna!
