Oregon gets one-third of its energy from coal, much of that coming from out-of-state. We send $295 million dollars out-of-state annually to pay for coal energy. Let’s bring our jobs home. Let’s invest in local clean energy instead of out-of-state coal!

Equivalent to the annual greenhouse gas emissions from about 3 million passenger vehicles.

Support the Coal to Clean Energy legislation, Senate Bill 477 and House Bill 2729, to move off of coal by 2025 and onto clean, renewable energy.
