CLEAN ENERGY CREATES JOBS IN DETROIT.

COAL CREATES DIRTY AIR AND ASTHMA ATTACKS.

DTE ENERGY CAN DO BETTER: INVEST IN CLEAN ENERGY JOBS FOR DETROIT

For too long DTE Energy has threatened our city by relying on dirty and dangerous coal-fired power plants and nuclear power plants. Instead of supporting healthy families and communities, DTE’s over-dependence on dirty energy has left metro Detroit with toxic air, all too frequent electric shutoffs, and higher hospital bills. Instead of continuing to rely on dirty coal, it’s time that DTE stood up for Detroit and created new, long-lasting jobs in our city and region. www.sierraclub.org/coal/MI
