Add your voice to the thousands of local families calling to protect our communities from dangerous coal exports. Join us at the upcoming Public Hearing to express your concerns about coal.
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission,

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Thank you.

Make a Difference:

This could be our best shot at preventing 44 million metric tons of dirty coal passing through Washington every year. Coal shipments to Asia would clog our railroads and ports, worsen the climate crisis, increase traffic delays, and spread toxic coal dust and diesel emissions that make our families sick.

We can do better.

To learn more about our campaign, contact Robin Everett at 949-361-7534 or robin.everett@sierraclub.org, and visit http://www.PowerPastCoal.org
