SIERRA CLUB
Dear Member of Congress,
The Trans-Pacific Partnership (TPP) Agreement could be the largest trade deal in history. Everything is at stake. Every indication is that the TPP would negatively impact the environment, jobs, workers, consumer protections, and more.

As your constituent, I urge you to ensure that any trade deal:
• Creates good jobs and ends off-shoring
• Protects the environment and our climate
• Reignites the American economy and puts our country back on track
• Defends the sovereignty of nations against attacks by corporations.

It is time for stronger worker, consumer and environmental standards in our trade deals. I’m counting on you to fight for these principles.

To find out more about this important issue, go to:

The Trans-Pacific Partnership (TPP) could mean:
• Lost jobs, by making it easier for corporations to offshore your work.
• Lower wages and fewer rights, by speeding up the global race to the bottom since it includes countries with even lower wages and fewer workers rights than China.
• The erosion of existing environmental protections, greater pollution from natural gas and other industries, and higher energy prices.
• Corporate attacks in private international courts that would gut our consumer, environmental, health and worker protections.

The TPP could mean:

We want a fair deal or no deal!!
