TVA: STOP WASTING BILLIONS ON DIRTY COAL.

I want 21st century clean energy solutions for a healthy future.
The Tennessee Valley Authority plans to invest more than $1 billion to keep the Gallatin coal-fired power plant running. Instead of wasting our money on an obsolete coal plant that will continue to pollute our air, water, and climate, TVA needs to replace the Gallatin plant with energy efficiency and clean energy. Burning coal is a dirty, backward business—it’s bad for our health and it’s bad for future generations. Continuing to burn coal in the 21st century violates TVA’s own vision to be one of the nation’s leading providers of low-cost and cleaner energy by 2020. It’s time for TVA to prioritize our economy, environment, and health.

TVA: Stop wasting billions on dirty coal.
