DO YOU WANT A CLEAN ENERGY FUTURE FOR NORTHEASTERN MINNESOTA?
Dear Minnesota Public Utilities Commission,

I am writing to ask the Public Utilities Commission to put Northeastern Minnesota on a path to a clean energy future.

Investments in wind, solar and energy efficiency in Northeastern Minnesota will create jobs and protect public health. Minnesota Power’s Baseload Diversification Study identifies the need to retire its oldest and dirtiest coal plants, but it does not outline a plan for when or how this transition will take place.

To protect customers, human health, and local communities, Minnesota Power needs to develop a plan and timeline to replace these plants with clean energy and energy efficiency in Northeastern Minnesota.
