MOVE MINNESOTA BEYOND COAL TO CLEAN ENERGY
Dear Commissioners (RE: Docket #15-21):

As a clean energy leader in Minnesota, Xcel Energy needs to develop a plan to phase out all of its remaining coal plants and replace them with wind, solar and energy efficiency - beginning with Sherco 1 & 2.

It’s time for Xcel to invest in clean energy and energy efficiency to ensure cleaner air to breathe, cleaner water to drink and better health for all Minnesotans.

Please require Xcel to include a transition/phase-out plan for Sherco 1 & 2 in this resource plan.

Find or host a house party or community meeting near you to learn more about Minnesota’s beyond coal to clean energy transition.

BE PART OF THE SOLUTION

Help send a strong message to Xcel and the Minnesota Public Utilities Commission that it’s time to move beyond coal by helping us collect postcards. We can provide postcards, factsheets and tips for asking folks to submit a comment. You can also volunteer with us at events around the state. Check the box below and contact Alexis Boxer at alexis.boxer@sierraclub.org or 612-259-2452
