ASSEMBLYMEMBERS MEDINA, BROWN, AND RODRIGUEZ:

Promoting clean energy and making buildings more efficient is great, but you refused to rein in oil pollution.

You wouldn’t support the bill until it was stripped of pollution-cutting measures that the oil industry hated. Your commitment to the oil industry is costing your most vulnerable constituents hundreds of dollars every year in medical expenses, lost school and work days, and their lives.

Your constituents breathe the nation’s dirtiest air, and you had the power to change that... but you didn’t.

We need you to do better.
