SDG&E: DON’T BLOCK OUR SUN!

SDG&E is trying to block the sun. Their monopoly finally has some competition — your roof. And right now, SDG&E is moving to add costly new fees and stiff penalties that would make solar too expensive and out of reach for everyday San Diego families.

That’s not right — solar is saving money for San Diego schools and families, reducing air pollution, and helping us leave a better and safer world for our kids. SDG&E, let the sun shine on San Diego families. Stop the attacks on rooftop solar and allow energy choice.

The California Public Utilities Commission will decide on SDG&E’s plan by the end of this year. Learn more and take action at www.sierraclub.org/EnergyChoice.
