Dear [Representative's Name],

I’m one of your constituents, and during this Congressional recess, I stopped by your office to ask you to oppose the Trump Administration’s extreme environmental agenda. Our clean air and water are being threatened, and we deserve to have our voices heard.

The Trump administration’s decisions to gut protections for our clean air and water, to put the fossil fuel industry’s profits over our health and future, and to abandon our country’s commitments to tackling the threat of climate change are deeply disturbing.

As my representative in Congress, I am asking you to stand up to the President’s dangerous actions and put our future and our children’s future first.
