DUKE ENERGY IS REFUSING TO MEET PEOPLE FACE-TO-FACE AT ITS ANNUAL SHAREHOLDER MEETING.

It seems Duke wants to keep burning dirty, polluting fossil fuels—and stick you with the bill.

Tell Duke we won’t be silenced. North Carolina deserves to be a national leader in the clean energy economy and our communities deserve a commitment to affordable, homegrown, job creating investments in wind and solar power. Duke must listen to and serve its customers. Tell Duke it’s time to move forward with a strong renewable energy program to power our homes and our future.

Visit sc.org/DukeStopHiding for more information, and to tell Duke now is the time to lead.
