DEFEND CAYUGA LAKE FROM BIG POLLUTERS
Governor Cuomo, 

The Cayuga Power Plant is old, dirty, bankrupt and unreliable, and has had to rely on ratepayer bailouts to stay open for too long. The new owners have not been able to ensure that this plant can operate responsibly or in an environmentally safe manner. It is time for this plant to retire and you can make it happen.

I’m concerned about the fires, the mercury pollution and the potential waste of millions of New Yorker’s dollars in keeping this plant afloat. New York can do better than continuing to prop up a dirty and outdated coal plant that is spewing mercury and other toxic pollutants into our air and water, endangering the health of our families and our environment.

Governor Cuomo, it’s time to make good on your pledge to end all coal fired power generation in the state by 2020, including Cayuga, and to help communities and workers through this transition.

Sincerely,
