Seizing our land, raising our utility bills, and polluting our air and water?

No thanks, Duke Energy.

Say NO to Duke Energy’s dirty, destructive Atlantic Coast Pipeline.

Duke Energy is trying to steal our land to put a gas pipeline through our community. The proposed 600-mile, $5.5 billion pipeline would transport fracked shale gas from Pennsylvania and cross more than 500 streams and wetlands in North Carolina. Its route threatens both privately owned farmland and communities of color. Now is the time to say NO to higher energy rates. Say NO to dirty fracked-gas pipelines.

Say NO to Duke’s Atlantic Coast Pipeline. SC.org/ACPipeline
