Support Senate Bill 100

The Future is Bright

100% CLEAN ENERGY IN CALIFORNIA

Support Senate Bill 100

It’s Time for 100% Clean Energy in California. JOBS. CLEAN AIR. SECURE CLIMATE.
Senate Bill 100 (SB100) builds on California’s clean energy leadership. It establishes a new statewide goal of 100% clean, renewable electricity by 2045.

Today, nearly half of California’s electricity is generated by non-polluting sources, like wind and solar. But we can and need to do better to cut air and climate pollution and create good jobs. The technology is ready to get us to 100% clean renewable energy.

We can create good jobs, cut energy bills, and end our reliance on polluting power plants. It’s possible. It’s necessary. And with SB 100, it will happen.

Dear Assemblymember Ridley-Thomas,

I’m signing my name and joining with my neighbors to urge you to support SB100, the legislation to move California to 100% clean energy by 2045. When we invest in clean energy, we create good jobs, local economic investment, cleaner air, and a healthier community. I urge your support for SB 100 today.

YES! I support SB 100 for jobs, clean air and a secure climate for our future!

I want a yard sign.

I want to help pass SB 100. How can I help?

I’d like to know more about SB 100.
