We all win by moving beyond coal

We CAN MOVE TO A COAL-FREE WASHINGTON

In its plan to state regulators, Puget Sound Energy has made clear that it wants to continue burning dirty, dangerous, and increasingly expensive coal for at least another 20 years. It’s time to break this cycle and choose cleaner and safer alternatives that will reduce climate pollution, benefit our communities, and create good jobs.

Speak up during the summer comment period!

Over the summer months, the Utility Transportation Commission (UTC) will be considering public comments as it makes its decision whether or not to approve PSE’s flawed energy plan. This is a pivotal moment when we can raise our voices and demand that PSE stop spending hundreds of millions of our hard earned dollars to prop up its dirty old coal plant, locking us into carbon pollution for another generation.

Please complete and return the attached postcard ASAP!

Tell our state regulators that you support a move to reject PSE’s dangerous plan to burn coal for decades in favor of cleaner, more sustainable renewable energy investments.

Dear Utility and Transportation Commission:

I am very disappointed that Puget Sound Energy is planning to continue financing its dirty, dangerous, and increasingly expensive coal plant for another 20 years. There are cleaner, safer, and less risky alternatives. PSE’s plant may require hundreds of millions of dollars to clean up its dirty air, water, and mining waste, and now is the time for PSE to be honest about the true cost of keeping a dying coal plant on life support. This is not where I want my next energy dollars spent. I urge the Commission to critically evaluate PSE’s long range plan and have them incorporate the true cost of coal.

Please do not approve any more ratepayer money for PSE’s dirty coal plant.

Please move beyond coal because...
