Welcome to Sierra Club Outings!

We’re pleased to report that since our last catalog, the number of trips we offer has returned to near pre-pandemic levels. As travel has resumed more broadly and many states and countries have relaxed mitigation measures, this development also comes with new challenges. Approximately 15 percent of our trips have had COVID cases; nearly all of those cases have been mild, and no one has required hospitalization. The vast majority of our participants are up-to-date on their vaccines, which has contributed greatly to our safety profile, and we strongly encourage everyone who wants to join us to stay current on their vaccines and boosters. We continue to follow increased safety measures on all trips, including testing of anyone with COVID-like symptoms. Thank you to our loyal trip participants for supporting our new health protocols and to our volunteer leaders for delivering safe and enjoyable trips in this challenging environment. You can learn more about our safety procedures, policies, and more at sc.org/outings.

In this catalog you will find a broad spectrum of conservation-based adventures in the United States and abroad, all designed to connect people with the outdoors and advocate for these wild places once they return home. In addition to the trips listed here, we hope you will check out Inspiring Connections Outdoors, Local Outdoors, and Military Outdoors, which are part of our larger movement to increase access to nature for all people. Learn more on page 32 or head to sierraclub.org/get-outside to view the full menu of ways to get outside with the Sierra Club.

As part of our work to ensure that our program reflects Sierra Club values and our commitments to equity, justice, and inclusion, we’re once again highlighting an expanded selection of trips specifically for audiences we want to draw in, including adults under 50, LGBTQIA+ people, women, and more. We also hope you’ll check out our trips for younger adults, which are heavily subsidized to make joining one of these experiences easier than ever. Additionally, travelers ages 18 to 35 are eligible for a $300 scholarship to participate in any of this year’s all-ages trips. For more on this, head to pages 22 to 23 or visit us at sc.org/outings.

Lastly, we’re taking a break from the profiles of trip staff, participants, and others that usually appear in this catalog to provide you with some fun and informative articles from a few of our volunteers. Thank you for being part of our movement—and here’s to more adventures ahead!

Adventures with a Cause: Our Commitment to the Planet

We’re part of the country’s oldest and largest grassroots environmental organization, and we’re serious about running our program responsibly. Here’s how we do it:

**We minimize our on-trip impact.**
Our trips revolve around low-impact activities such as hiking and kayaking, and we follow Leave No Trace principles (see page 6). We also try to use group transportation where possible.

**We contribute 25,000 volunteer hours per year to land agencies.**
Through our service trip program, we connect nearly 1,000 volunteers per year with understaffed land agencies such as the National Park Service and the U.S. Forest Service. We estimate that our trips contribute at least 25,000 hours of work per year. See page 27 for service trips.

**We create connections to the outdoors for all people.**
Our Inspiring Connections Outdoors, Local Outdoors, and Military Outdoors programs create lifelong connections to nature to improve the social, physical, mental, and environmental health of our nation. For more on this, see page 32.

**Most important, we inspire activism.**
We provide the tools. The rest is up to you. All our trips immerse you in the splendor of one of our planet’s wild places and inform you about local environmental challenges and what you can do to help. It was the impetus for our very first trip in 1901, and it’s still the reason we run our program today.

Treading Softly upon the Earth: The Ethics of Leaving No Trace

Environmental standards have changed since the days when William Colby romped through the wilds with 100 Sierra Club members and dozens of mules. In the 1970s, the Sierra Club pioneered a set of backcountry principles to reduce the impact of our trips by complying with a set of scientifically developed “wilderness manners.” Today, we incorporate a universally adopted set of outdoor ethics known as Leave No Trace™ into all of our outdoor activities.

Minimizing our impact depends on attitude, awareness, judgment, and experience. Necessarily, our practices depend on where we’re traveling—each wilderness area’s soil, vegetation, wildlife, moisture levels, and the amount and effect of prior use inform our approach. The Leave No Trace Center for Outdoor Ethics principles are:

- Plan ahead and prepare
- Travel and camp on durable surfaces
- Dispose of waste properly
- Leave what you find
- Minimize campfire impacts
- Respect wildlife
- Be considerate of others

Prepare for Your Next Backpack Trip with These 10 Tried-and-True Hacks

Anyone who’s been on a backpacking trip knows that it’s all about striking the right balance. Being prepared for blisters, bears, backcountry cooking, and inclement weather is essential, but when you’re hiking five or more miles a day with all of your belongings on your back, one less pound makes a world of difference. So how do you equip yourself for such an experience without the kitchen sink? Simply ask our volunteer trip leaders, who have been honing these specialized skills for years or even decades. “It’s important to look at all the little things because the weight adds up,” says Dave Neumann, who has been leading California backpack trips on and off since the 1970s (when gear was heavier and clunkier than it is today) and who also serves as a volunteer ranger and wilderness first responder with the National Park Service. “Selecting lighter and multiuse items, like a phone that can serve as your GPS and camera, reduces the physical load and simplifies life on the trail.” In recent years, Dave has led an effort to kickstart the Sierra Club’s coed teen backpacking trips he led back in the ’70s and ’80s and has enlisted other leaders to help introduce a new generation to the joys of the outdoors.

So are you ready to hit the trail with the perfect combination of useful—but-lightweight gear? Then read on for Dave’s top 10 hacks. And if you’re a budding young backpacker seeking your next wilderness experience, you can view a full list of 2023 teen trips on pages 11 to 12.

1. Dry your belongings while you hike.
   Between rain, stream crossings, and swims, it’s likely that some of your clothing will get wet or damp during a multiday backpack trip. Bring a few large safety pins to hang your socks and other wet clothing on your pack so they can dry while you’re hiking.

2. Treat your clothes with insect repellant.
   Ward off mosquitoes and ticks and reduce the amount of chemicals you put on your skin by spraying your clothes with a high-quality insect repellant. Note, however, that rain gear and down jackets should not be treated, as the spray may possibly damage the fabric.

3. Bring a pair of sleeping socks.
   Don’t risk getting your only clean pair of socks wet before bedtime. Instead, designate a pair that will stay dry in your pack to wear overnight. Keeping your feet warm is especially critical for cold nights at high elevations!

4. Pack only the sunscreen you need.
   Rather than bringing an entire bottle of sunscreen, you can save weight and space by decanting just the right amount into a small, two-ounce plastic bottle with a flip lid.

5. Keep the bottom of your tent dry.
   Buy a sheet of waterproof home wrap, which is available from building supply stores, and cut it so that it’s half an inch shorter than the footprint of your tent. Laying it underneath the tent will prevent rain from seeping in.

6. Clean your bowl after dinner with a tea bag.
   Once you finish your meal, fill the bowl with eight ounces of hot water, put in a tea bag to steep, drink the tea—which is usually all you’ll taste—then use the tea bag to clean your bowl. This trick has been used on Sierra Club trips for years.

7. Make your pack waterproof.
   Line your backpack with a heavy-duty plastic garbage bag or contractor bag to keep the contents dry. It’s more effective than a pack cover, which usually protects only the top and front of your pack.

8. Mark your hiking poles.
   Wrap a couple feet of duct tape around your left hiking pole so that you can easily identify which pole goes in your left hand when it’s time to hit the trail.

9. Assemble a backcountry bathroom bag.
   Use a small stuff sack for your trowel, toilet paper, and hand sanitizer so you’re ready to go when nature calls. And make sure you give yourself plenty of time to dig that six-to-eight-inch-deep cat hole, which is deeper than you think!

10. Skip the heavy water bottle.
    Bring two one-liter recyclable plastic bottles of your favorite sports drink. Drink them on day one, then refill them with filtered water. These weigh less than a typical reusable water bottle, plus you can carry one on each side to help balance your pack.

**Choose Your Comfort Level: Camp or Lodge**

In an effort to keep our service trips as affordable as possible, most involve camping. If you’d rather rest your work-weary bones in a soft bed, try one of our lodge-based trips, marked with this symbol. Accommodations are typically rustic, such as dormitories, cabins, or research stations, and they are always shared.
How do you prepare a healthy and nourishing snack when you’re far from home? And what does it take to feed a group of hungry campers, either at the beginning of the day, in the middle of a hike, or after a challenging service project? It’s a perennial challenge that generations of wilderness explorers and outdoor enthusiasts have pondered. Lucky for you, our best service trip cooks are here to help!

“Advance planning and preparation is key,” says Deborah Wine, cook training coordinator for the Service subcommittee. She’s been cooking for service trips since 2016 and is especially adept at providing delicious and nutritious vegetarian and plant-based meals. “Base-camp cooking is easier than backpack-trip food preparation since you don’t have to carry all the ingredients in your pack,” says Didi Toaspern, training officer for the Service subcommittee. “But making it healthy, hearty, and quick requires forethought and a few shortcuts.” Since the late ’80s, Didi has led and cooked for service trips in a variety of locations across the West, her favorite being wilderness areas with fly-fishing opportunities (she prefers to catch and release fish but is more than happy to cook up her catch if requested).

We asked Deborah and Didi for some of their favorite base-camp snack and meal ideas; here’s what they whipped up for us. Join one of their upcoming Sierra Club trips, “California Dreaming: Redwoods, Beaches, and Service” (see p. 27) and “Women’s Service along the Central Coast, California” (see p. 31), or try these out for yourself on your next adventure!

1. Overnight oats

This is a hearty, healthy breakfast to get volunteers off to a strong start on the work project. Quick-cooking steel-cut oats are the perfect choice. Simply add nuts, dried fruit, and/or milk, then partially cook the combination the night before. “Preparation in the morning is a snap,” says Deborah, “and campers love the melded flavors and creamy richness.”

2. Cornmeal pancakes

“Chili and cornbread is a winning combination,” Didi tells us, “and it’s still possible in a camp kitchen.” Simply follow your favorite cornbread recipe, but increase the liquid and fry it up as pancakes. “It’s always fun to witness the surprise on people’s faces when they realize this traditional pairing is possible far from an oven!”

3. Homemade cocoa mix

A cup of hot chocolate is a welcome treat after a long day of hard work—especially if the evening is chilly. Frustrated with excess packaging or added preservatives? Do-it-yourself cocoa mix is a snap! “Blend your ingredients ahead and adjust until it’s as sweet, creamy, or spicy as you like,” Deborah explains. “Add some cinnamon and a bit of cayenne, and you have Mexican hot chocolate to round out taco night.”

4. Trail mix tricks

It wouldn’t really be hiking (or vigorous service work) without trail mix. Make your own with whatever combination of dried fruit, nuts, and candy-coated chocolate pieces you like, then divide it up in equal portions and hand it out at the first lunch. Package the trail mix in a reusable silicone baggie—one fewer piece of single-use plastic!

5. Palestinian lentils

“This is my newest favorite dinner,” proclaims Deborah, who notes that it’s as easy to make as it is delicious. Just boil two cups of soaked and drained red lentils with about eight cups of water for 10 minutes while sautéing onions with garlic, cumin, a dash of turmeric, and salt. Once the lentils are done, add the onions and spices, garnish with parsley, and serve with lemon wedges on the side. “Add your favorite side salad and pita bread, and voilà—dinner is served!”

Inspiring Connections Outdoors
Each year, Inspiring Connections Outdoors (ICO) volunteers provide safe, inspiring, and fun outdoor adventures with over 14,000 participants—mostly youth from communities of color and low-income groups. Volunteer leaders work with partner organizations to engage their communities on hiking, camping, backpacking, paddling, snow, and service trips in areas near and far from their homes. ICO strives to highlight the known benefits of engaging with the outdoors, such as enhanced feelings of social connection, curiosity, self-efficacy, and life purpose. It also aims to create the next generation of environmental and social justice leaders, increase exposure to outdoor recreation, support grassroots community leadership, and build a broad platform for all people to access the outdoors. ICO is funded entirely by grants and your generous donations. To learn more, volunteer, or donate, visit sc.org/ico.

Local Outings
The Sierra Club offers over 15,000 local and mostly free trips each year led by dedicated Sierra Club volunteers who reflect the communities where they live and play outside. Participants are welcome regardless of background and experience. We offer outdoor activities that connect folks to nature and each other in a multiplicity of ways: day hikes, peak scrambles, bicycling, cross-country skiing, birdwatching, conservation-oriented walks, and forays into the natural areas of our major cities. Find trips near you at sc.org/localoutdoors.

Military Outdoors
The Sierra Club Military Outdoors (SCMO) is a project of the Outdoors for All Campaign working to improve the lives of veterans and their families through connections with the outdoors and by inspiring members of the military and veteran community to become outspoken champions for environmental conservation and justice. Learn more at sc.org/military.

Outdoors for All
Outdoors for All is a priority campaign of the Sierra Club’s Our Wild America. The goal of the campaign is to expand equitable and public access to the outdoors for all, especially those who lack nearby nature and are underrepresented in the outdoors. The campaign is working to close the nature equity gap by ensuring an additional 50 million people can exercise their human right to connect with the outdoors. Outdoors for All advocates for and works with partners to establish and activate local parks and green spaces, establish transit to trail routes, remove and replace racist and derogatory monuments and symbols on public lands, reduce entry fees and other costs associated with accessing public lands, and support programs, such as Sierra Club Outings, to directly serve communities with welcoming and inclusive outdoor experiences. For more, visit sierraclub.org/outdoors-for-all.

Yosemite Conservation Heritage Center
The Yosemite Conservation Heritage Center (YCHC), a National Historic Landmark, was built by the Sierra Club in 1903–4. The Sierra Club still operates the iconic structure as a public education and visitor center, presenting and promoting the conservation ethic through public programs, educational displays, a publicly accessible library, and interactive programs for kids and families. Information for how to volunteer or to plan your visit is at sc.org/yosemite-conservation-heritage-center.

Earth is an enormous place, home to a stunning variety of life, including humans, animals, plants, and even microscopic bacteria. Experiencing all of the environments that support the full range of our planet’s biodiversity—from mountains and deserts to the deepest depths of the ocean—could take a lifetime. So, you may be wondering, what are the top destinations for witnessing this remarkable biological abundance? And where are the best places to observe epic wildlife in their natural habitat?

We couldn’t think of a better person to answer this question than our very own Kath Giel, who has led many of our most ambitious and wildlife-rich international trips since 2001. “Travels to remote parts of the world help us to not only experience the rich diversity of cultures, wildlife, and environments but also connect with the common concerns and challenges that we face in the world,” she explains. An avid backpacker, mountaineer, and traveler, Kath has visited over 100 countries and many of the world’s major mountain ranges in search of uncommon experiences. Her passion for fascinating world cultures and endangered animals has resulted in trips to such rarely seen regions as Antarctica, Borneo, Norway’s Svalbard archipelago, Madagascar, and more.

Which of these miraculous places make the list? Read on for a roundup of Kath’s favorites and what you can expect to see there. We frequently run trips to all of these destinations, so if you don’t see one of them in this catalog, be sure to check back soon!

1. Antarctica: Penguins, seals, whales, and orcas
Antarctica is the most pristine wilderness in the world. The remote beauty, vast landscapes, and wildlife are simply unparalleled. This once-in-a-lifetime trip is a must for serious adventurers.

2. Norway: Polar bears, reindeer, walrus, whales
Though the Arctic is being severely impacted by climate change, it is still a wonder of biodiversity. This destination offers a unique opportunity to witness remarkable wildlife and consider how our actions impact the natural world.

3. Borneo: Orangutans, pygmy elephants, sun bears, monkeys, hornbills
With its dense rainforests, tropical coastal islands, and jungle valleys, Borneo is one of the most biodiverse places in the world. Anticipate an abundance of exotic mammals, including some that can be seen only at night, and many species of butterflies, plants, and insects.

4. Botswana and Zimbabwe: Elephants, giraffes, lions, leopards, jackals, hyenas, monkeys, birds
A mobile camping safari is the perfect way to experience Africa’s wild beauty and endless variety of wildlife. No visit would be complete without a stop at Victoria Falls, which provides habitat to many endemic species of plants and animals.

5. Tanzania: Elephants, lions, rhinos, leopards, Cape buffalo
Of all the African wildlife areas, none surpasses Tanzania for spectacular scenery and wildlife. With 12 national parks and millions of wild animals, there is no shortage of awe-inspiring sights to be found.

6. India: Tigers, leopards, bison, gaurs, sambar, chital, barasingha, barking deer
India’s complex ecosystem is home to many magnificent yet endangered creatures. Among the numerous highlights are observing tigers in their natural habitat and Kanha National Park, which was portrayed by Rudyard Kipling in his short story collection The Jungle Book.

7. The Galápagos Islands, Ecuador: Galápagos tortoises, marine iguanas, Darwin’s finches, penguins
The wildly diverse ecosystems of the Galápagos Islands are a haven for unique wildlife, half of which are found nowhere else. And the magic is, they are approachable by humans!

8. Uganda: Mountain gorillas, chimpanzees, golden monkeys
Uganda’s experimental approach to save mountain gorillas from extinction allows tourists the rare chance to visit them in the wild. Curious visitors can also take a night walk for a chance of spotting an ancient species of galago, a small night primate with very large eyes.

9. Costa Rica: Sloths, monkeys, coatis, anteaters
This tropical, biologically diverse country is considered a paradise for ecotourism, and for good reason. Its rainforests, beaches, volcanoes, mountains, and lowlands are prime habitat for a wide variety of flora and fauna and provide plentiful opportunities for active exploration.

Final billing is based on the sign-up level at 90 days prior to the trip start date. If, between final billing and trip start dates, the sign-up level goes up sufficiently to qualify for the low-tier price, we will apply the lower price and will process refunds on the trip start date for any differences in amounts paid.
